DETAILED ACTION

Election/Restrictions

1. Please cancel withdrawn claims.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-5, 7-11, 13-17, 19-22, 28-29, 30, 36, 49-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newman (USPN 5,616,132) and further in view of Flaherty et al. (USPN 7,303,549) and further in view of Ueda et al. (USPN 7,252,653) and Rise et al. (USPN 5,752,930).

Newman discloses a needle that moves from multiple positions that is on a diagram (18) that is adjusted by the air pressure that is released by the top cover hat interacts with the ball valve. Newman fails to teach the specific size of the needle, the specific flow rate and applying an adhesive to the device's housing.

Flaherty et al. discloses a delivery device with retraction means, injection means, and adhesive means that is an adhesive layer on the outer surface of the housing (Column 21).

Therefore, at the time of the invention it would have been obvious for one of ordinary skill in the art to combine the device of Newman with the teachings of Flaherty because Flaherty discloses the benefit of using an adhesive layer on the housing since

it allows for flexing of the skin during attachment and aids in the patients comfort (see Column 21 lines 54-65). With regards to the other limitations not explicitly recited in the prior art are the flow rate and the size of the needle diameter. Both of these are well known variables that depend on the type of medication, size of the apparatus and form of treatment. Therefore, it would have been obvious to modify the needle and flow rate of the prior art in order to fulfill the claim limitations since all the other limitations are present. Ueda et al. discloses the benefit of having needles with the specific claimed dimensions (see entire reference). Rise et al. discloses varying the flow rate from 1 micro liter per minute to 5000 micro liter per minute. Therefore, these references show how one of ordinary skill in the art could adjust the prior art reference to make changes to the needle and flow rate, since these changes are so common in the medical art.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/605,187

Art Unit: 3763

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F. DeSanto whose telephone number is 571-272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick LUCCHESI can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
